Introduction

The SA Platform uses Web and security technologies, giving users ubiquitous remote access to corporate resources using a Web browser. This document describes the platforms (operating system/browser combinations) that have been qualified for use with the SA.

SA Hardware Requirements

Service Package Version 7.3R1 is supported on the following SA platforms:

- Junos Pulse Secure Access Service 700
- Junos Pulse Secure Access Service 4000/6000-FIPS
- Junos Pulse Secure Access Service 2500/4500/6500
- Junos Pulse Secure Access Service 4500/6500-FIPS
- Junos Pulse Secure Access Service 2600
- Junos Pulse Secure Access Service 4610
- Junos Pulse Secure Access Service 6610(with SM 160 and SM 360)
- Junos Pulse Secure Access Service 6611(with SM 160 and SM 360)

Platform Support

Juniper Networks tests the mentioned functionalities of the SA Platform on most widely used corporate and consumer platforms to qualify each platform as either qualified or compatible.

The platforms in this list are divided into two categories: compatible and qualified. The complete list of platforms/browsers in the document is supported. If problems are encountered on either a qualified or a compatible platform then Juniper support will attempt to resolve the issue.

Windows XP: Refers to Windows XP Professional/Home Edition

Windows Vista or Vista refers to Windows Vista Enterprise/Ultimate/Business/Home Basic/Home Premium

Windows 7: Refers to Windows 7 Enterprise/Ultimate/Professional/Home Basic/Home Premium

Windows 8: Refers to Windows 8 normal-edition/Pro/Enterprise/Windows RT

All of the information is valid on the date when the document was published. This applies to the comment for 'and above' versions stated in this document as well.

For all newer versions of browsers and operating systems please contact Juniper Support.

Qualified Platform

The platforms listed in the “qualified” category have been systematically tested by QA department as part of the release covered by the Supported Platforms document.

Compatible Platform

The platforms listed in the “compatible” category have not been systematically tested by our QA department in this release but based on testing in previous releases and knowledge of the platform Juniper expects that the functionality will work and will fully support these platforms.

Multiple Language Support

All the end-user functionality has been localized in German, French, Japanese, Traditional Chinese, Simplified Chinese, Spanish, and Korean. The administrator user interface is supported in English only.
