

Before you begin:

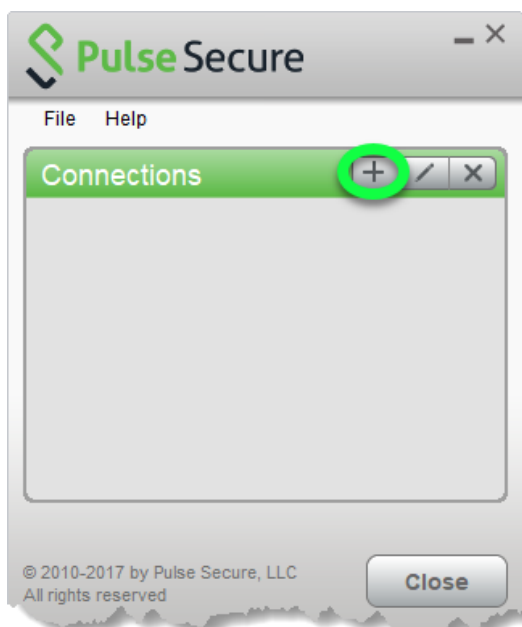

For the best experience, make sure you only connect to VPN when necessary, and disconnect as soon as you are done your session.

Get started

1. Open **Pulse Secure** by searching for it in the Windows search bar or by clicking **Start**  and scrolling through your apps. *If Pulse Secure is not already installed on your computer, [click here](#).*

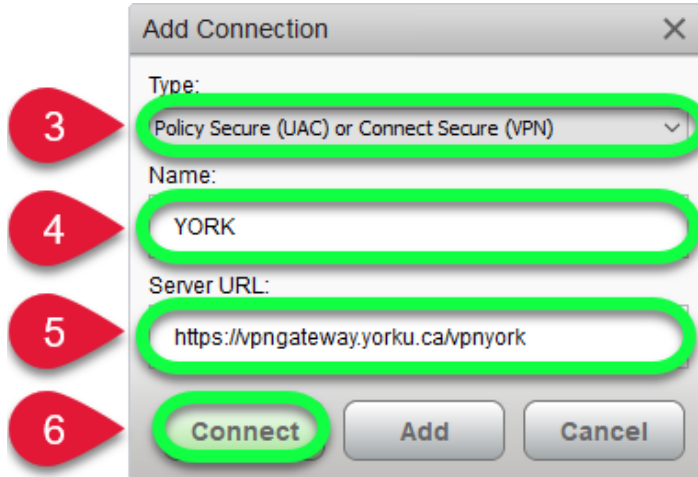

2. Once the Pulse Secure app opens, click on the **Add Connection** icon (+) to add a connection

Connecting to Pulse Secure

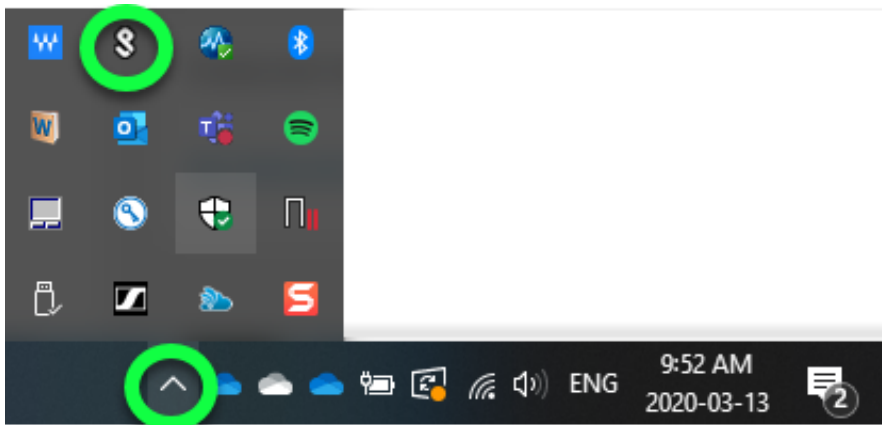

3. For the **Type** field, make sure the **Policy Secure (UAC) or Connect Secure VPN** option is selected
4. For the **Name** field, enter a descriptive name. You can just call it **YORK** to keep things simple
5. For the **Server URL field**, add the following URL: **https://vpngateway.yorku.ca/vpnyork**
6. Click **Connect**. This will add the connection and send the connection request.

7. Enter your **Passport York username and password** to finalize the connection. You are now connected!

How to disconnect from Pulse Secure:

1. Open the Pulse Secure app from your Windows system tray (bottom right-hand corner of your screen)

2. For each active connection, click **Disconnect**
