

Accessing classic SIS applications from MyApps

MyApps is replacing Citrix to become the platform used to access classic SIS applications (COS, PES, SPS, EAS, STAC, TRS, TRR). Web-based SIS applications available on www.sis.yorku.ca are not impacted.

Step 1: URL: <https://myapps.yorku.ca/>

Step 2: Enter your Passport York username and password
Ensure English (Canadian) is selected

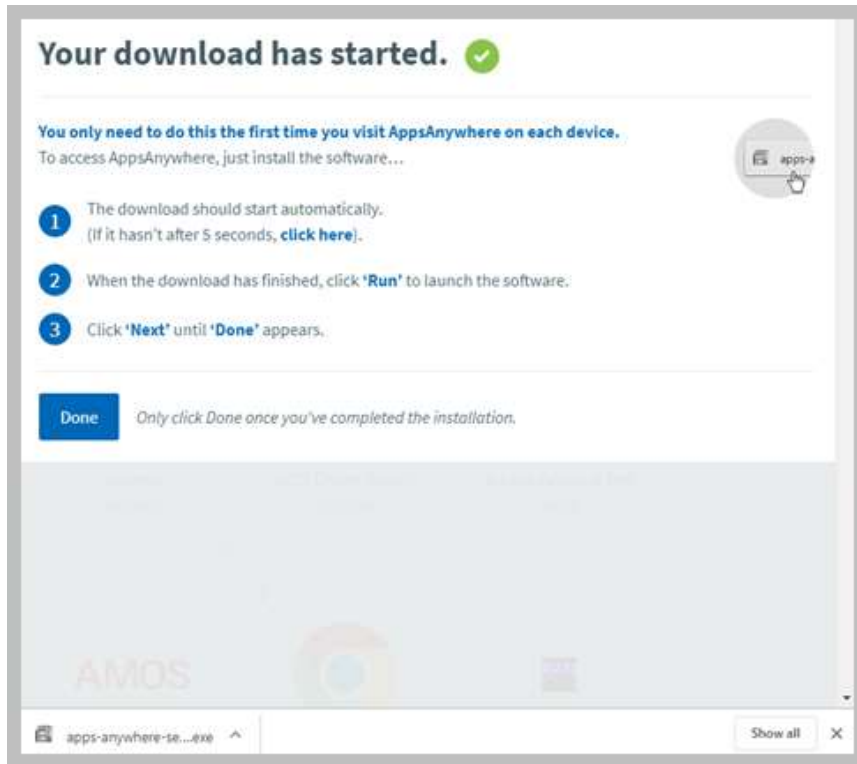

The screenshot shows the MyApps login interface for York University. At the top center is the York University logo. Below it is a language selection dropdown menu with a Canadian flag icon and the text "English (Canadian)". Underneath are two input fields: the first is for the username, with a blue icon of a person and the text "YORKU \ |Username"; the second is for the password, with a blue icon of a padlock and the text "Password". At the bottom of the form is a "Sign in" button.

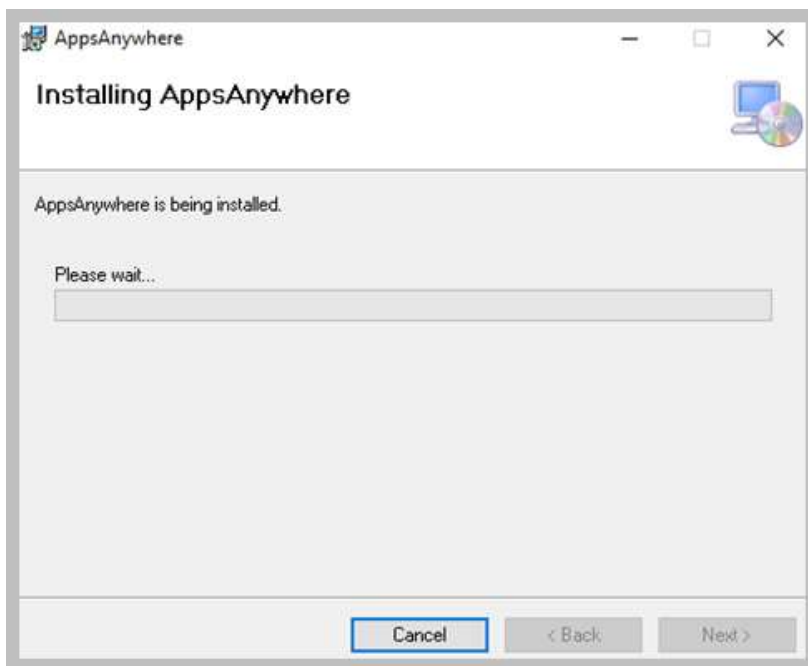

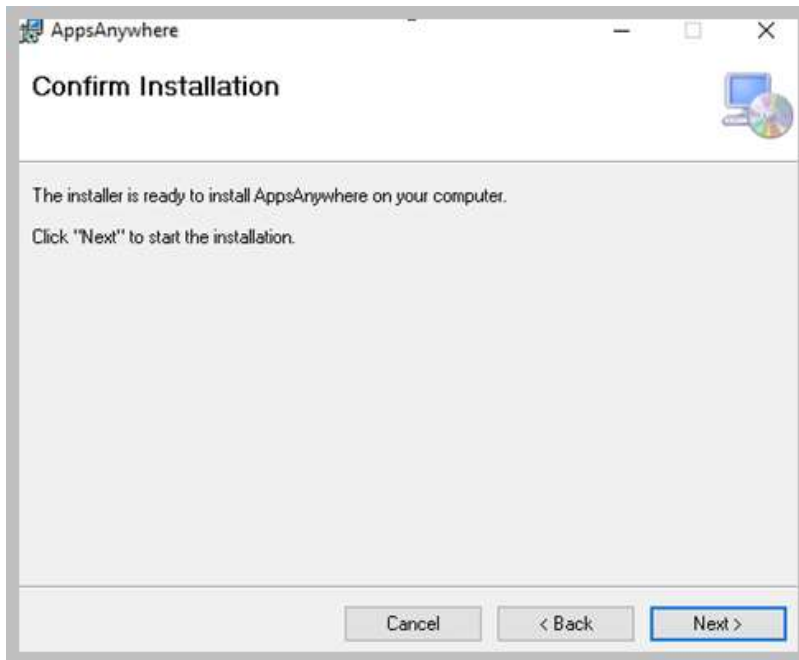

Step 3: If it is your first time using MyApps, you will have to install AppsAnywhere software.

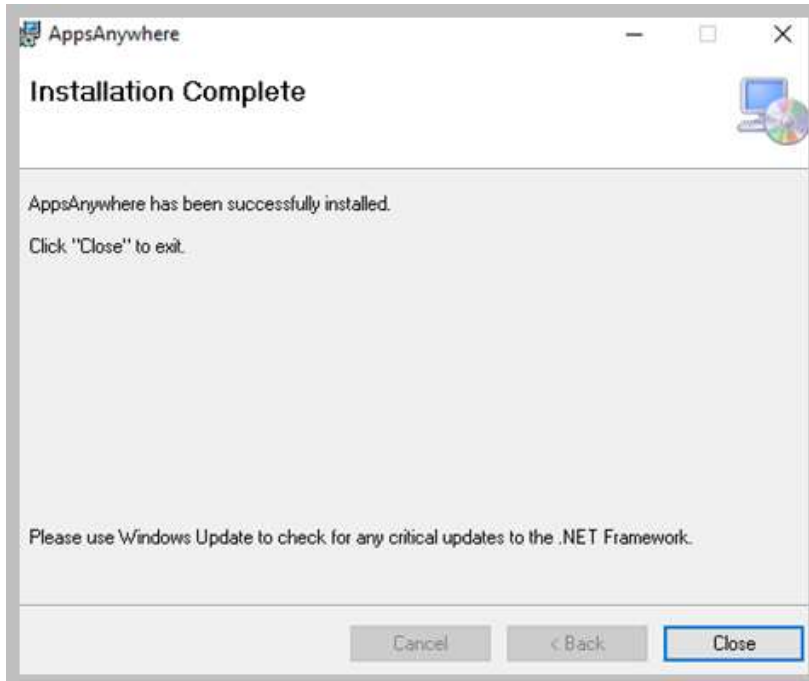

The screenshot shows a "Welcome to AppsAnywhere" screen. The title "Welcome to AppsAnywhere" is centered at the top. Below the title are two buttons: a blue button on the left with the text "It's my first time using AppsAnywhere on this device. Let's go." and a green button on the right with the text "I've already used AppsAnywhere on this device!".

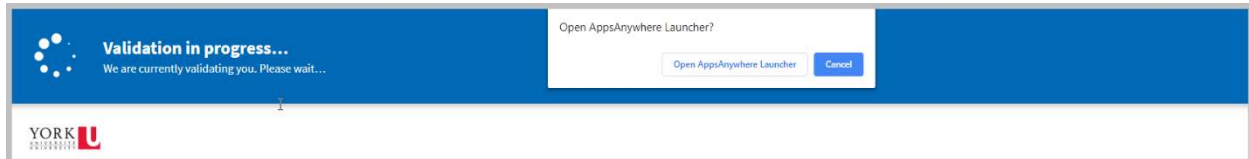

It will automatically download the setup file. Follow the instructions to complete the installation.

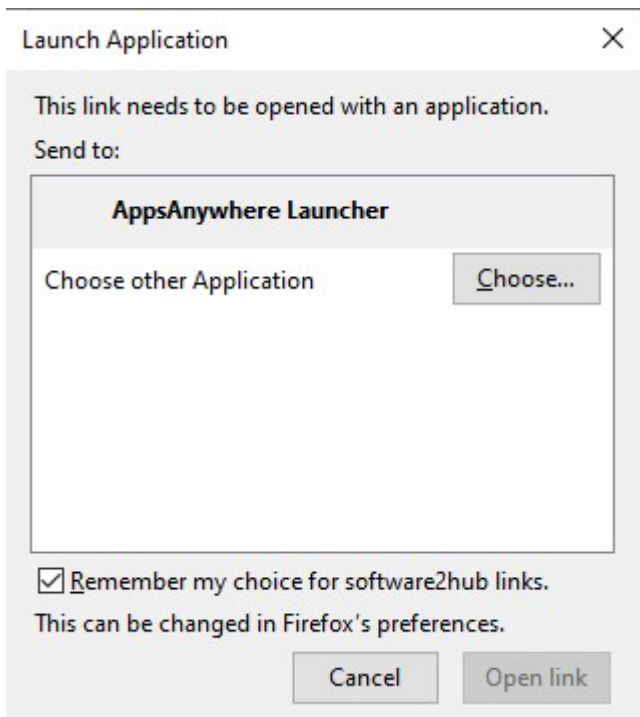

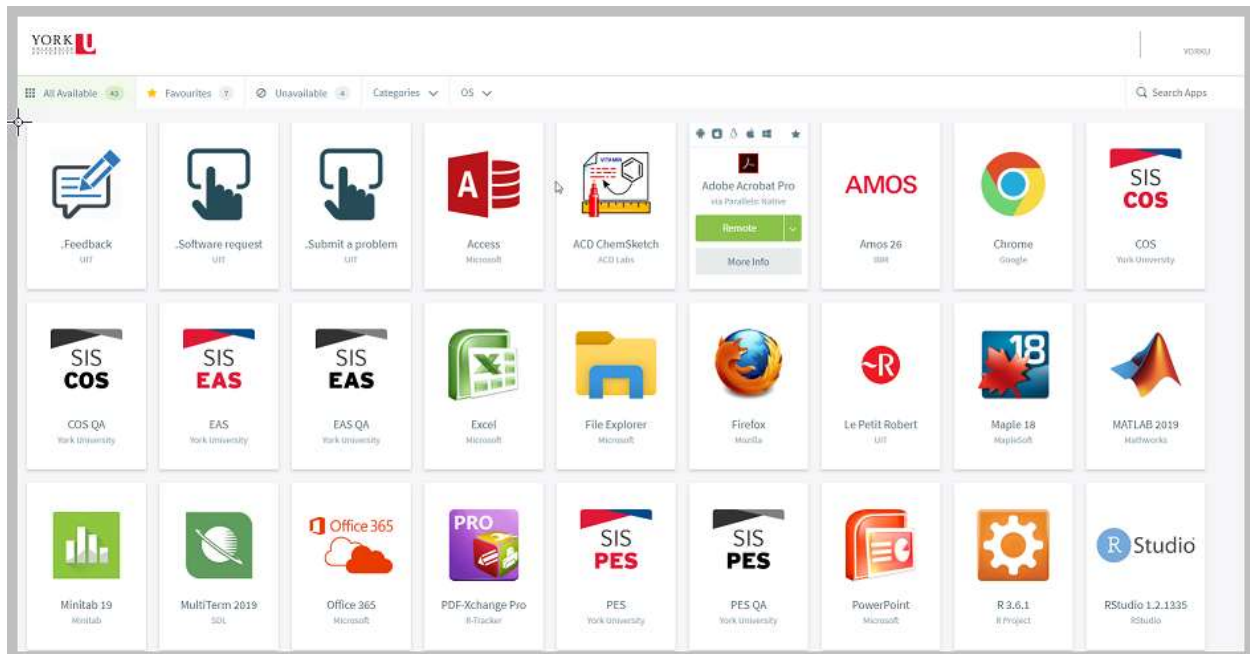

Step 4: AppsAnywhere will need validation. Select Open AppsAnywhere Launcher.

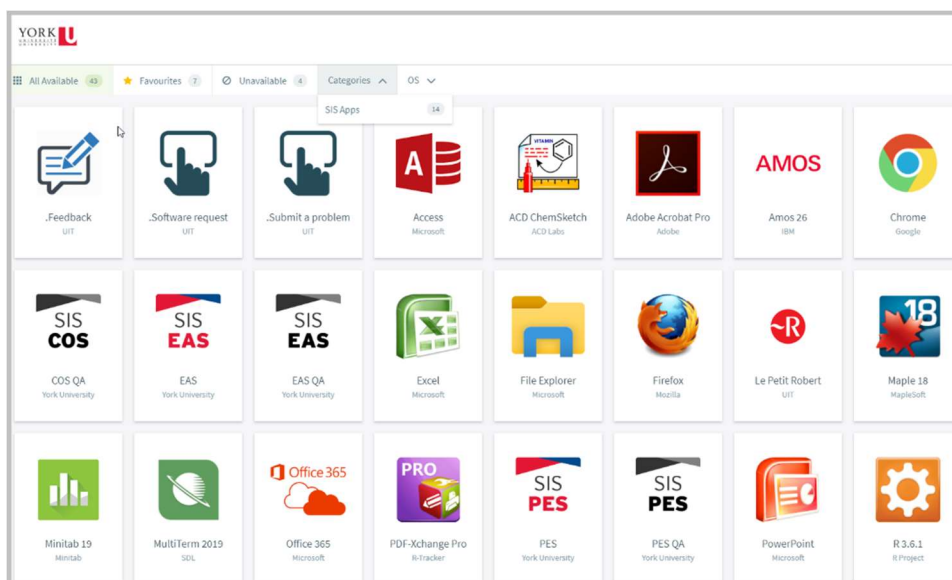

Select Open Link when AppsAnywhere Launcher is highlighted and mark the “Remember my choice...” checkbox.

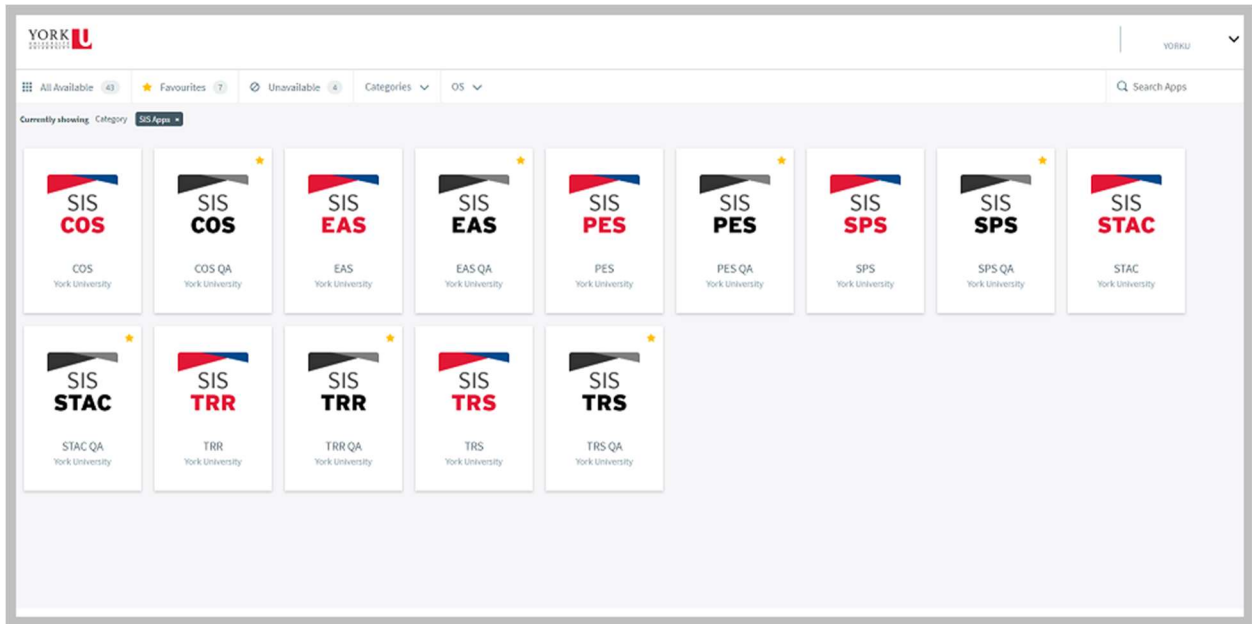

Step 5: After the successful validation you will see the list of applications you have access to. You can use the search bar in the top right corner of the screen to find the application you wish to launch.

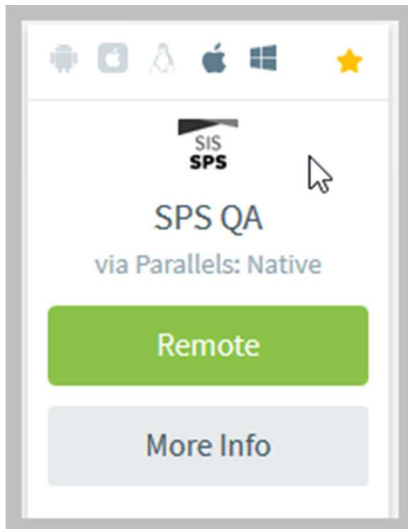

You can also access your SIS applications by clicking Categories and select SIS Apps.

To launch an application, click on the Remote button.

Use your Passport York account at the login screen:
